

**Centor Software Corporation  
Compliance X-Sight Solution**

August 30, 2004

# Centor Software Corporation

---

- Centor Software Corporation is a proven provider of environmental compliance solutions for automotive and electronics
- Based in Irvine, California
- Our principal product is Compliance X-Sight™, which is used by large companies to collect, analyze, and report environmental compliance

# Compliance X-Sight

- Compliance X-Sight is used to
  - Assemble product BoM data with supplier-provided material composition data
  - Perform detailed analysis on the products to
    - Measure compliance using substance threshold analysis
    - Determine supplier compliance or reporting deficiencies
    - View product recycled content
  - Report to various targets such as
    - IMDS
    - Company proprietary formats (automotive and electronics)

# Compliance X-Sight

- Compliance X-Sight was initially focused on ELV reporting by automotive tier 1 suppliers
  - 13 of the top 15 global automotive suppliers use Compliance X-Sight
  - In production since 2002
  - Direct interface to IMDS

- **Centor pioneered a data collection process that is used by many tier 1 automotive suppliers today**
  - Based on Compliance Connect™ - an intelligent spreadsheet sent to suppliers to enter the material composition of supplied components
  - Purchased and distributed to suppliers by the AIAG (Automotive Industry Action Group)
  - Several electronics companies have also purchased and distribute Compliance Connect to their supply chain

# Compliance X-Sight

- Our current focus is on EEE
  - Jabil Circuit, Inc. is a key customer providing EEE requirements
  - Recent releases have included the following features
    - Substance of Concern properties including
      - Maximum Reflow Temperature Rating
      - J-STD-020 Moisture Sensitivity Level
      - Component Terminal Plating/Surface Finish
      - Plan for Compliance (date and new MPN)
    - Automatic RoHS compliance calculation using JIG substance classifications
    - Automatic calculation of lead-free Process compliance

# Compliance X-Sight

## ■ Conclusion

- Compliance X-Sight is a proven solution used by many large automotive and electronics companies to collect, analyze, and report compliance in products
- Centor is committed to meeting the needs of the electrical and electronics industry for WEEE, RoHS, lead-free process, and other compliance requirements
