## Facts & Figures

**Mission** iNEMI's mission is to identify and close technology gaps, which includes the development and integration of the electronics industry supply infrastructure. The accelerated deployment of technology is shaped and led by our member firms, and provides benefits to the global electronics industry.

**Overview** The International Electronics Manufacturing Initiative is an industry-led consortium of more than 65 electronics manufacturers, suppliers, associations, government agencies and universities. iNEMI roadmaps the needs of the global electronics industry and ensures competitiveness through development of industry infrastructure, accelerated deployment of new technologies, dissemination of efficient business practices and stimulation of standards. The consortium also works with government, universities and other funding agencies to set priorities for future industry needs and R&D initiatives.

**Offices** iNEMI is a "virtual consortium" with a small support staff based in Herndon, Virginia (in the Washington, D.C. area) and offices in Asia and Europe. All projects are managed by the participating organizations, and all work is done at the participants' facilities and by their respective staffs.
