

Join us for the 2009 iNEMI Roadmap Workshop

Get an advance look at the electronics industry's future technology needs

Co-sponsored by IMEC and SMTA

18 June 2008 / 08:30-16:30

The iNEMI roadmap charts the future manufacturing technology and infrastructure needs of the global electronics industry, identifying the key developments needed to ensure the competitiveness of the supply chain over the next decade. Our roadmap is recognized worldwide as an important tool for defining the "state of the art" in the electronics industry as well as identifying emerging and disruptive technologies. It also helps industry, government funding agencies and university-based research programs set critical R&D priorities.

Plan to participate in the European workshop if you want to:

- Get an advance look at select roadmap chapters.
- Ensure inclusion of key European issues in the 2009 Roadmap.
- Network with industry leaders.
- Receive a copy of the 2009 Roadmap when it is released to industry next year (a value of US\$325).

Topics to be covered include:

Medical product sector	Organic & printed electronics
Portable/consumer product sector	Board assembly
Environmentally conscious electronics	Final assembly
Solid state illumination & photovoltaics	Interconnect substrates (organic & ceramic)
	Packaging

iNEMI membership is not required to participate in the roadmap. This workshop is open to non-members.

For information about iNEMI activities in Europe, please contact Grace O'Malley at gomalley@inemi.org.

REGISTRATION

REGISTER BY 12 JUNE

Registration fee

US\$300 (waived for iNEMI members & workshop speakers)

Registration & additional information

www.inemi.org/cms/calendar/2009_RM_Euro08.html

Location

IMEC headquarters
Go to the IMEC 1 reception area
Kapeldreef 75 / 3001 Heverlee
Leuven, Belgium
