

## December 2009

### **In this Issue:**

**Welcome/Introduction to 2011 iNEMI Roadmap Cycle**

**Updated 2011 Roadmap Schedule**

**Status of Roadmap Leadership Opportunities Update**

**Environmental Webinar Held December 15**

**PEG/TC Review Meeting Rescheduled for January 8**

**2011 Roadmap Cycle – February TWG Kick-Off Venue Confirmed**

### **Welcome to the 2011 Roadmap Cycle**

Welcome to the fifth newsletter of the 2011 iNEMI Roadmap cycle. This and subsequent monthly newsletters will be dedicated to keeping you informed about the progress of the 2011 iNEMI Roadmap. Please pass this newsletter on to anyone within your technical network who might be interested in participating. More information about the Roadmap Newsletter can be found [here](#).

### **Recent Activity**

#### **Work Continues on the 2011 Roadmap**

We have finalized more of the 2011 Roadmap schedule, completed the PEG kick-off meetings in San Diego, and we are recruiting a few PEG and TWG leaders as needed. The updated schedule for this roadmap cycle can be found [here](#). We are still finalizing some of the meeting dates and venues. You will notice that we have scheduled some roadmap meetings in connection with other popular industry venues and meetings that may allow participants to justify their travel plans around both. We used WebEx for the meeting at SMTAI with success, and we plan to use it for all roadmap meetings that will allow.

#### **iNEMI ECE Roadmap Webinar (December 15, 2009)**

[Creating a Better World Through Electronics](#), Bill Bader, iNEMI; Grace O'Malley, iNEMI; Jos Beekwilder, Océ Technologies; Markus Stutz, Dell

Thanks are extended to those who attended iNEMI's ECE (Environmentally Conscious Electronics) Webinar. The time you've taken from your busy schedule is appreciated and indicates that you recognize environmental concerns as critical to the future of the electronics industry. For those unable to attend, the presentations may be accessed by clicking the highlighted "Creating a Better World Through Electronics" above. We would like to have your input on how to best move the industry forward. iNEMI strives to serve the electronics industry by involving a diverse range of members, each of whom have important and unique contributions to offer. The projects we collectively sponsor are well defined and targeted to meet the most critical needs of an industry that is continually and rapidly developing, especially in the environmental arena.

We are providing the material presented during the Webinar to a larger audience, and we are interested in your view of how useful the presentations are and what key messages you received from the information given. We would like to ask you a few questions about the material presented during the webinar so that we can continue to improve our presentation of relevant and timely information. The survey can be found [here](#).

### **2011 Roadmap Preview Presentation/Medical PEG Organizational Meetings**

Chuck Richardson hosted a bi-monthly 2011 Roadmap Medical PEG organizational Web meeting on December 3 and an introductory meeting with the Energy Storage & Conversion TWG on December 4. These meetings were the first of a series of organizational meetings planned to help PEG Chairs and new TWG Chairs get their committees organized, staffed and moving forward in order to meet goals for roadmap deliverables. Chuck has made all the PEG Chairs aware of this option in an email sent out November 10. He will also make any new TWG Chairs aware of this capability as they come on board the 2011 roadmap team.

### **Upcoming Events**

#### **PEG Chair / T.C. Status Review (January 8, 2010)**

The next meeting of the PEG Chairs and a number of select T.C. members is rescheduled from December 17 to January 8, 2010 due to several time conflicts. The time is 2:00-4:00 PM CST and will utilize a WebEx session with 15 minutes per PEG review status presentation. A new announcement and agenda were sent out December 16 as part of Outlook and email invitations.

#### **TWG Chair Telecon (January 11, 2010)**

Chuck will host a telecon with the 2011 roadmap TWG Chairs for the purpose of preparing them for the kick-off meeting on February 23-24, 2010. He will discuss the logistics and format and answer any questions that are posed.

#### **TWG Kickoff Meeting (February 23-24, 2010 in Silicon Valley)**

The next major event will be the TWG kick-off meeting on February 23-24, 2010 in Silicon Valley and hosted by Agilent at their corporate headquarters. This meeting is held to allow all the TWG and PEG Chairs/participants to meet and exchange information and begin cross cut planning. The PEGs are expected to provide a preliminary key attributes spreadsheet and chapter outline at this meeting so that the TWGs can begin their work with the information in hand. Each of the TWGs will meet and discuss areas to be covered and report out to the group at the end. Depending on the travel restrictions in place, we may have to alter the meeting format for better remote participation. All Chairs should plan to attend this meeting either in person or by WebEx or try and get a PEG or TWG representative to represent their group. Details of the meeting, including the preliminary agenda, can be accessed at [http://www.inemi.org/cms/calendar/2011\\_RM\\_NA\\_Feb10.html](http://www.inemi.org/cms/calendar/2011_RM_NA_Feb10.html).

### **Get Involved**

We are continuing to recruit for leadership openings. We are presently requesting applicants for Chair and Co-chair of the Netcom PEG, Co-Chair for the Office/Large Business Systems PEG, Board Assembly TWG Chair and co-chairs for several others. If you have been thinking about serving the industry as a roadmap PEG or TWG Chair, or as a participant on one of the TWGs or PEGs, please contact Chuck Richardson and he will work with you to decide if this is the cycle to get involved. The "Final Assembly" TWG has already asked for participants to help in their chapter development effort. ***INEMI membership is not required to participate in roadmap development.*** In fact, the more diversified the representatives

working on the roadmap, the broader the reach and the more valuable to the industry. With the wide range of technology categories, it should be easy to find one that stirs your interest and calls you to participate.

The iNEMI Roadmap has become recognized as an important tool for defining the “state of the art” in the electronics industry as well as identifying emerging and disruptive technologies. It also includes keys to developing future iNEMI projects and setting industry R&D priorities over the next 10 years.

With the “globalization” of the iNEMI Roadmap, each “edition” of the roadmap should become even more important as a tool for identifying technology gaps and possible solutions for an increasingly global industry. If you would like to be involved with the 2011 iNEMI Roadmap team, or be added to the mailing list of this monthly newsletter, please contact Chuck Richardson at [Chuck.Richardson@inemi.org](mailto:Chuck.Richardson@inemi.org).
